

**Remarks**

Applicants note that the amendments to remove the "N,N-" from the recitation of "2-(N,N-diethylamino)ethyl methacrylate)" and "2-(N,N-dimethylamino)ethyl (meth)acrylate" is intended to reduce confusion. "2-(N,N-diethylamino)ethyl methacrylate)" and "2-(N,N-dimethylamino)ethyl (meth)acrylate" are synonymous with "2-(diethylamino)ethyl methacrylate)" and "2-(dimethylamino)ethyl (meth)acrylate," yet the latter is more commonly used. Thus, no new matter is added with this amendment.

The amendment to change the reference to Fig. 3 to Fig. 5 is intended to correct a typographical error. As can be seen from the Brief Description of the Drawings, beginning at page 31, line 19, "Fig. 5 is a conceptual diagram showing an integral-type leukocyte removal filter device," whereas "Fig. 3 is a scanning electron photomicrograph (3,000-fold) showing the section of a composite porous membrane obtained in Example 1." Thus, no new matter is added with this amendment.

If there is any fee due in connection with the filing of this Preliminary Amendment, please charge the fee to Deposit Account No. 19-0089.

Respectfully submitted,  
Yasuhiro NAKANO et al.
